CAREER OBJECTIVE

Motivated and detail-oriented Computer Science student specializing in Artificial Intelligence and Machine Learning. Strong foundation in data science, natural language processing, and machine learning algorithms, with hands-on experience building real-world projects such as a Fake News Detection system and an AI-powered data assistant. Proficient in Python and frameworks like Flask and Streamlit, with a focus on developing scalable, user-friendly applications. Eager to apply analytical and problem-solving skills in a challenging data-driven role.

EDUCATION

Godavari Institute of Engineering and Technology -(GIET)	2021-2025
Artificial intelligence and machine learning	CGPA-7.62

TECHNICAL SKILLS

Programming	: Python, Machine learning
Web Development	: HTML, CSS
Databases	: MySQL, SQL
Frameworks/Tools	: Git, Github, Excel, Bootstrap, Flask, Power BI, Fast API
Soft Skills	: Critical Thinking, Team Collaboration, Adaptability, Communication, Time Management, Project Ownership

INTERNSHIPS

Aimers – Artificial Intelligence Intern

- Fine-tuned **NLP models** using **Hugging Face Transformers** and deployed secure inference pipelines on **AWS EC2**, improving accuracy by **~15%**. (Tech: Python, PyTorch/TensorFlow, Hugging Face, Docker, REST APIs, Git, Colab, Jupyter)

Techwing – Java Full Stack Trainee

- Developed **RESTful APIs** with **Java & Spring Boot** and integrated frontend/backend components, enhancing UI performance by **~20%**. (Tech: Java, Spring Boot/MVC, MySQL, JDBC, Git, GitHub, Postman)

PROJECTS

Deep Learning in Cervical Cancer Diagnosis

- Implemented **CNN, DenseNet, and Inception** models for cervical cancer image segmentation, improving detection accuracy by **~18%** over traditional methods (**SVM, KNN**).
- Developed a **Flask-based web interface** for image upload and real-time prediction using **Python, OpenCV, and Jupyter Notebook**.
- Evaluated models using **Accuracy, Precision, Recall, and F1-Score**, achieving an **F1-Score > 0.90** for the best-performing architecture.
- **Skills/Tech**: Python, TensorFlow/PyTorch, Flask, OpenCV, Deep Learning, Model Evaluation.

House Price Prediction System

- Developed a **Machine Learning** web application to predict **house prices** based on area, BHK, and budget
- Performed data cleaning and preprocessing using **Pandas** and trained the model using **Scikit-learn**.
- Built the application using **Flask** with a responsive frontend using **HTML/CSS**.
- Deployed the project on **Render** for live hosting.
- **Skills/Tech**: Pandas, Scikit-learn, Flask, Machine Learning, Model Training, HTML, CSS, Render, Git/GitHub
- **Link**: [hyd-house-rent-prediction](#)

Fake News Detection System

- Developed a **machine learning**-based web application to classify news articles as **real or fake using NLP techniques**.
- Implemented **text preprocessing**, feature extraction (TF-IDF), and classification models for **accurate prediction**.
- Built an interactive UI using **Flask** for real-time user input and predictions.
- Achieved **~92% accuracy** and improved performance using model evaluation techniques.
- **Skills**: Python, Machine Learning, NLP, TF-IDF, Data Preprocessing, Model Evaluation, Flask, HTML, CSS

CERTIFICATIONS

- **Java IT Specialist – Certiport (Credly)**: Demonstrated proficiency in **Core Java, OOPs, Exception Handling, Collections, JDBC**, and application development best practices.
- **Python for Data Science – NPTEL**: Gained hands-on skills in **Python, NumPy, Pandas, Matplotlib, Data Preprocessing, and Basic ML workflows** for data analysis and visualization.
